AIS Health and Safety Plan

A. INTRODUCTION

1. Scope

The policies and procedures described here apply to all employees of the Department of American Indian Studies of the University of Washington, hereafter referred to as AIS.

2. Health and Safety Policy

The aim of this Health and Safety Plan is to provide a safe, healthful and efficient work environment for all, including faculty, staff employees, students, and visitors to the department.

3. Responsibility

The Department Chair, Administrator, and Academic Counselor are responsible for maintaining safe work practices in their respective areas, including required health and safety training. AIS requires all employees to comply with health and safety regulations, with departmental policies and procedures that apply to their own conduct on the job, and to report accidents, injuries, and unsafe conditions to their supervisor.

4. Safety Coordinator

The Department Chair and Administrator have been given adequate authority to carry out the following responsibilities:

- Auditing compliance with this Health & Safety Plan
- Updating this Plan, at least annually
- Coordinating with Environmental Health & Safety
- Working with faculty, staff and students to resolve safety complaints
- Keeping safety bulletin boards current
- Maintaining safety records
- Keeping the department head aware of current safety concerns.

B. FUNDAMENTALS

The following seven fundamental health and safety items apply to all employees of AIS:

1. New Employee Safety Orientation

It is the responsibility of the Chair and Administrator to make certain that all new employees under their supervision, including those that are permanent, temporary, or part-time, complete the Departmental New Employee Safety Orientation in a timely fashion.

2. Emergency Evacuation and Operations Plan (EEOP)

The Department has developed procedures for evacuation in an emergency and for response to fires, bomb threats, chemical spills, earthquakes, etc. The fundamentals of the EEOP are summarized below:

a. Building Floor Plan

Building floor plans show safety equipment and exit pathways on all floors of Padelford. Building floor plans are mounted on the walls at the entrance to all elevators, and stairwells. Do not use elevators in an emergency evacuation situation. The floor plans show the location of fire extinguishers and fire alarm pulls.

AIS Health and Safety Plan

b. Evacuation procedures

- The alarm signal to evacuate the building is a slow “whooping” sound accompanied by flashing strobe lights.
- Instructors and teaching assistants must be familiar with the detailed evacuation procedure for their classroom and feel comfortable directing the students under their control. See the emergency information posted in the buildings where you are teaching.
- Exit the building via the emergency exit doors and stairwells. The last person leaving the office/work space should close the door.
- Follow the instructions of the floor wardens who can be identified by their colored hats and clip boards.
- Proceed to the evacuation assembly points (see below)
- NOTE: in the special case of an **earthquake** the building emergency alarm is unlikely to function. Do not evacuate the building until the shaking has stopped. Seek cover under desks or tables if available. Instructors and teaching assistants should reassure and advise their class on the correct response. If there are no tables (i.e. in a lecture theatre) students should be instructed to **drop** to the floor, **cover** their head, and **hold that position**. Once the shaking has stopped students should be instructed to evacuate the building according to the instructions above. Emergency Detailed procedures for Faculty, Lecturers, and Teaching Assistants may be found at:

www.ehs.washington.edu/SafPlan/Index.htm

c. Evacuation assembly points

The evacuation assembly point for Padelford Departments is in the HUB parking lot.

d. Methods for accounting for staff, students, visitors

- Evacuation assembly points are controlled by the appropriate floor warden. Identify yourself to the floor warden (wearing green hats) and follow their instructions.
- If you have a visitor ensure that the visitor accompanies you during the evacuation procedure.
- Instructors and teaching assistants should ensure that their class remains together as a group and work with the students to ensure that all are accounted for.
- Remain at the assembly area unless instructed by an official. Do not reenter the building until the all clear is given by the Floor Wardens as instructed by the Fire Department.

e. Mobility impaired occupants

Give all reasonable assistance to mobility impaired occupants of the building. Inform the Fire Department of the person's needs and whereabouts.

3. Accidents

a. Medical Emergencies

All medical emergencies must be reported to the nearest Emergency Medical Services (EMS). To do this:

Dial 911 from Campus phones

Remain calm, state the nature of the emergency. Answer all questions asked by the emergency dispatcher.

AIS Health and Safety Plan

b. Reporting accidents and incidents

All accidents *and near misses* must be reported to the employee's supervisor as soon as possible. Near misses are valuable opportunities to correct unsafe situations. The University provides a report form which includes provision for the supervisor's comments and signature. This form can be found and filled out at the Online Accident Reporting System (OARS)

<http://www.ehs.washington.edu/ohsoars/index.shtm>

The appropriate Department Administrator, listed on the "*back page*" of this document, must also be apprised of the accident or incident.

c. Investigation

All accidents and near accidents must be investigated by the supervisor who then summarizes the details and corrective measures in the above report. EH&S and the Department's safety committee review the report. Assistance from EH&S is available by calling 543-7388.

4. First Aid and CPR Access

First aid kits are located in the office of the floor wardens. The floor wardens are encouraged to receive training in first aid. The names of the floor wardens and the locations of their office are listed on the "*back page*" of this document.

5. Safety Problems: Reporting and Resolving

Employees are encouraged to report safety concerns to their supervisor. If employees do not feel they can do this, or have done so and do not feel the problem has been resolved, they may discuss the situation directly with their safety coordinator or safety committee representative given below. Assistance from EH&S is available, if needed, to resolve a problem. Safety problems may be reported on the same form as accidents and incidents.

6. Safety Meetings

The department Safety Committee meets during the last week of each quarter. The names and phone numbers of current committee members may be found at:

http://www.ehs.washington.edu/ohssafcom/organizational_members.pdf and on the "*back page*" of this document. The committee welcomes feedback and suggestions from all members of the department.

7. Safety Bulletin Boards

The departmental safety bulletin boards are used for posting safety related information. The department safety bulletin board is located outside the main entrance to the AIS suite of offices in C-514 Padelford.

C. ACCIDENT PREVENTION

1. Identification of Hazards
2. Reduction of Hazards
3. Safety Inspections
4. First Aid and CPR Training
5. Safety Training: On-Going
6. Medical Exams and Vaccinations

AIS Health and Safety Plan

Employees should identify potential hazards in their work space and consult with their supervisors for appropriate action or training classes. Supervisors should ensure that their employees' training is current. Information on training classes available can be found at <http://www.ehs.washington.edu>.

D. THE SAFE CAMPUS PROGRAM

While there are specific regulatory requirements for hospitals and late night retail operations regarding workplace violence that don't apply to general University operations, we do recognize that individual attacks on faculty, staff and students can and have occurred due to domestic violence or workplace violence. As part of maintaining a healthy, safe working environment, the University has developed and administers one UW Violence in the Workplace Policy and Procedure through the Human Resource's Violence Prevention and Response Program. Information on the program/policies is published on the UW website at

<http://www.washington.edu/admin/hr/polproc/workviolence/index.html>

University services include nighttime safety escort services, counseling sessions, a dedicated assessment team, and informational materials and training, but services are not limited to these items. All managers, supervisors, and employees must be aware of the appropriate processes to follow regarding workplace and domestic violence prevention. They can receive assistance in answering any employee questions from the HR Violence Prevention and Response Program Manager. We expect our entire faculty and staff to take Workplace Violence training at least once every biennium, as well as receive information during new employee orientation. We arrange for the biennial training [fill in the method used by your work group]. Records of the training are maintained in the [give location] Office. For more comprehensive information, access the Safe Campus website at

<http://www.washington.edu/safecampus/>

If any staff has concerns regarding a threat of violence, call:

- . Seattle: (206) 685-SAFE (2066857233)
- . Bothell: (425) 352-SAFE (4253527233)
- . Tacoma: (253) 692-SAFE (2536927233)

In a life threatening situation or imminent danger call 911, immediately.
